Experience

Software Developer

Jan 2023 – Aug 2023 (8 months)

oneRoot.farm

- Built and optimized frontend components using React.js & Tailwind CSS
- Assisted in backend development with Node.js, Express, and MongoDB
- Integrated APIs and developed data-driven dashboards for field operations
- Collaborated with the team to improve system performance and usability

Projects

Farmer & Ticket Management System (MERN Stack)

Built UI & backend for managing farmers, agents, and crop-related tickets with CSV download and inline editing.

Plivo Daily Report Dashboard (React, Tailwind, Lucide Icons)

Developed a data dashboard with filters, pagination, and copy-to-clipboard features.

Restaurant Food Ordering App (React, Tailwind, API)

Designed a mobile-first responsive app with dynamic data fetching and filters.

Docker Clone (Next.js, Tailwind)

Built a fully responsive Docker website clone.

LinkedIn Clone (Next.js, Clerk Auth, MongoDB, Cloudinary, Cloudflare)

Developed a full-stack LinkedIn clone with user profiles, posts, likes, and comments.

Education

Diploma in Computer Science Engineering

Strengths

- Strong problem-solving and debugging skills
- Quick learner, adaptable to new technologies
- Team player with attention to detail
- Passionate about building scalable and user-friendly applications
